Mr. Alexander Holtzman
Philip Morris, Inc.
100 Park Avenue
New York, New York 10017

Dear Mr. Holtzman:

The enclosed documents are a selection of post-1974 papers on cotinine as a marker for inhaled nicotine. Several deal mainly with analytical methods, but most discuss correlation with smoking amount, individual variation in nicotine metabolism, and other parameters which might affect the validity of the determination. There are approximately 8 other 1975-1981 papers on the subject which seemed of lesser interest; I would be happy to forward these as well as selections from the earlier literature if you feel they would be of interest.

Sincerely,

Sue Slaughter
Management Associate
